## **Pediatric Preventive Health Care Recommendations**

MVP Health Care® encourages all members with children to select a pediatrician. Routine doctor visits help keep your child, and "tween" or teen healthy. If there are any problems, these checkups—also referred to as **well-child care visits**—help the doctor detect them early before they become serious. **Well-child care visits** are a preventive care benefit and covered in full under your MVP medical plan.

## Immunizations—A Great Way to Keep Kids Healthy

Immunizations are needed to protect your child from potentially life-threatening illnesses. Vaccination has enabled a reduction of most vaccine-preventable diseases to very low levels in the United States. Additional information and immunization schedules recommended by the Centers for Disease Control (CDC) are available at cdc.gov. Select Healthy Living, then Vaccines & Immunizations. Talk to your doctor to determine which immunizations and tests are right for your child.

## MVP Will Help You Find a Doctor

Visit **mvphealthcare.com** and select *Find a Doctor*. You can search for providers by name, location, or specialty. Or you can call the MVP Customer Care Center at the phone number on the back of your MVP Member ID card.
